

## Speed-Brush

The towed Speed-Brush uses land drive to rotate the two independent soft bristle brushes against the direction of travel. The sweeping action works sand & other materials into holes / grass sward making the surface immediately playable. The brushes can be angled to move material inwards.

| Specifications                     |             |
|------------------------------------|-------------|
| SKU                                | 142.140.010 |
| Working width (m)                  | 1.4         |
| Working width (inch)               | 55.1        |
| Max. Working speed (km h)          | 15          |
| Working speed (mph)                | 9.3         |
| Weight (kg)                        | 181         |
| Weight (lbs)                       | 399         |
| Max. capacity ( m <sup>2</sup> hr) | 21000       |
| Max. capacity (ft <sup>2</sup> hr) | 226042      |
