Rink H1500

The land driven Rink H1500 drop spreader is favoured due to its simple yet tough design. The H1500 has an adjustable gate to control the amount of material spread & a lever to start/stop the spreading from the operator's seat. The Optional rear brush sweeps the material in leaving a neat finish

Specifications

SKU	S0001566
Operation	Towed version
Working width (m)	1.5
Working width (inch)	59
Spreading width up to (mm)	up to 0.95
Spreading width up to (inch)	up to 37.4
Hopper capacity (m3)	0.4
Hopper capacity (FT3)	14
Spreading thickness (mm)	0.3 - 10
Min. Tractor HP required	24
Empty Weight (kg)	180
Empty Weight (lbs)	396
